Amshaamsha Foundation

# From the Director

**“The first step in our journey, our 2022-2027 Strategic Action Plan, will help chart our route and achieve significant progress on our way to being the reliable partner in the sector.”**

I am super excited to introduce to you the Amshaamsha Foundation, an organization created by passionate and committed individuals who want to make a difference on the earth we live in and love. In the year 2020 we challenged ourselves to expand our horizon, by setting ambitious goals to do more to our environment through innovation, partnerships and community engagements to promote sustainable development. These ambitions led us to institutionalize Amshaamsha Foundation as a support engine. We are living in a period of tremendous climatic changes that already show serious challenges to our social, environmental and economic trends of life, and if we do not do something about it together, we will have serious repercussions. Human and natural systems are influenced by climate variability and hazards, with the negative impacts most severely felt in developing countries.

The first step in our journey, is our 2022-2027 Strategic Action Plan, which will help us chart our course and make considerable progress on our way to becoming an ambitious organization that focuses on climate change adaptation and mitigation across the continent and the world at large, with bold ambitions for the future, and unwavering commitments.

For our communities to thrive, we must together hold ourselves accountable for tomorrow, and as a group of professionals within our communities, we are committed to fostering an inclusive culture within ourselves, while engaging and capacitating local communities to develop sustainable and eco-friendly solutions. The need to tackle the climate crisis by addressing GHG emissions is both unequivocal and urgent. Equally important is the need to reverse nature loss and the degradation of ecological systems to deliver our climate commitments. We emphasize on women, youths, and special groups engagement, to address issues of clean-cooking, productive use of energy to our economic activities, especially sustainable agriculture which is a backbone to most African communities.

While a number of countries have made ambitious commitments to reaching Net-0 emissions by 2050; and we are also committed to develop strategic partnerships and coalition to support these global achievements, by keeping the goal of 1.5°C alive and reduce global emissions by 45% by the year 2030.

Once again, welcome to Amshaamsha Foundation, a breath of fresh air, driven by commitment, partnership and passion for the earth we live in and love.

Together we can go FAR!

# Who We Are

---

**Amshaamsha Foundation (AAF) is an innovative non-profit on a mission to restore our climate to the current and the future generation.**

Our mission goes beyond merely surviving and enduring climate change. We are creating the ecosystem needed for climate Restoration, Mitigation, and Adaptation. We work with young men and women, local and global partners, scientists, innovators, policymakers, citizens, faith leaders, and students of all ages and backgrounds.

We are building on our network, wealth of experience to create a healthy climate by advancing innovative solutions, i.e. renewable energy technologies, clean-cooking, to enhance education, health, livelihoods and other productive or economic activities within our societies.

---

## Vision

To be a leading non-governmental organization committed to addressing issues towards a peaceful and sustainable world based on societies living in harmony with their environment.

## Mission

To bring about transformation towards sustainability and equity within societies with innovative and environmentally friendly approaches to mitigate climate change.

# Our Strategic Goals

---

**01**

## **Renewable Energy Ecosystems Builders**

Building an ecosystem that promotes access to clean energy through the DREEM Model.

**02**

## **Climate Change Mitigation and Adaptation**

Innovatively adjust to the existing effects, while making the impact of climate change less severe by preventing or reducing (GHG) production.

**03**

## **Clean Cooking Promotion**

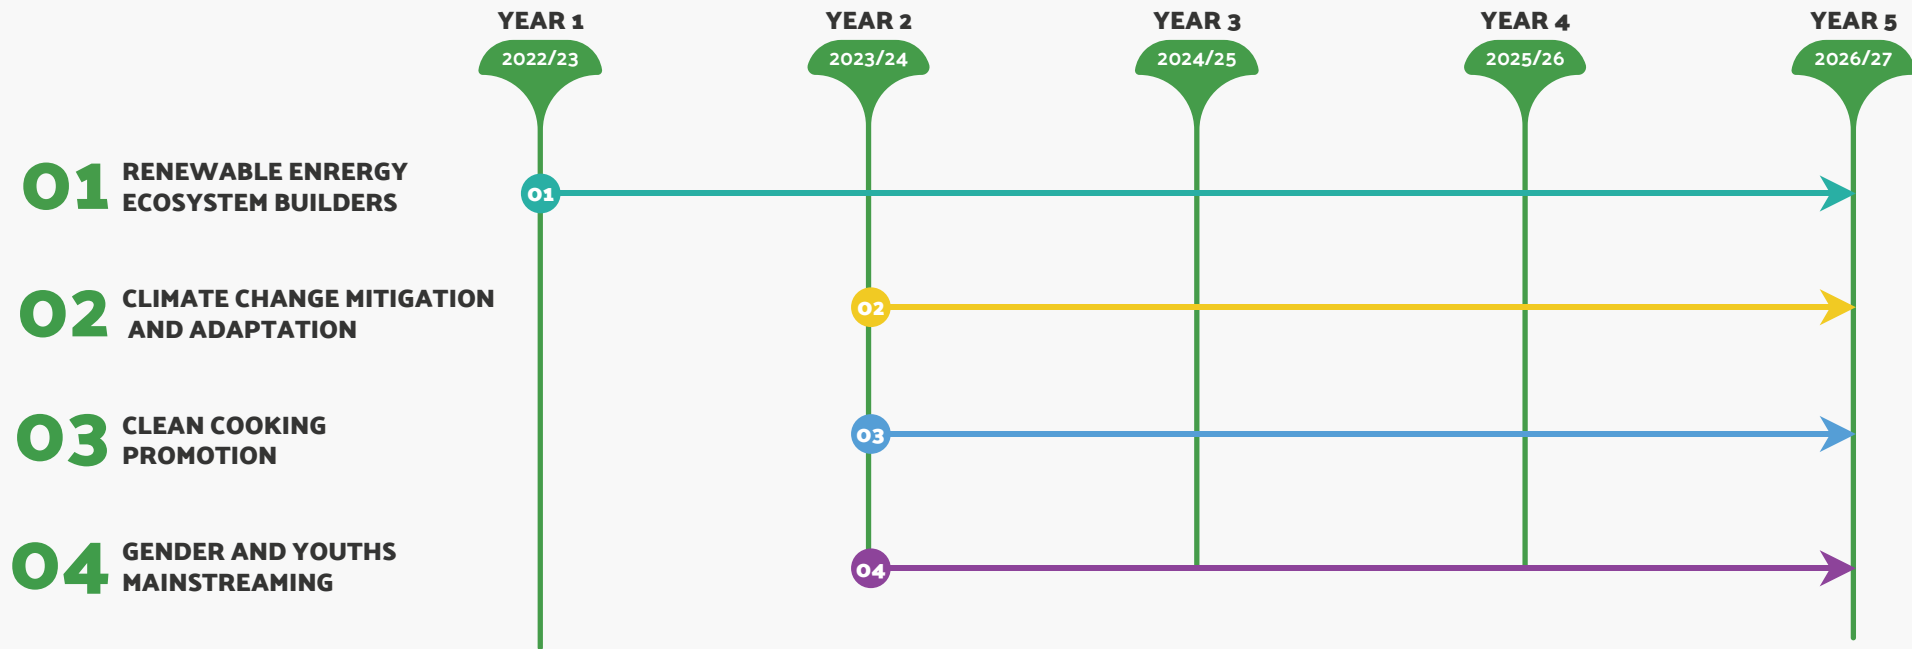

Promoting Clean, Efficient Cooking Technologies and Fuels as a cross-cutting solution that can achieve better health, environment for community development.

**04**

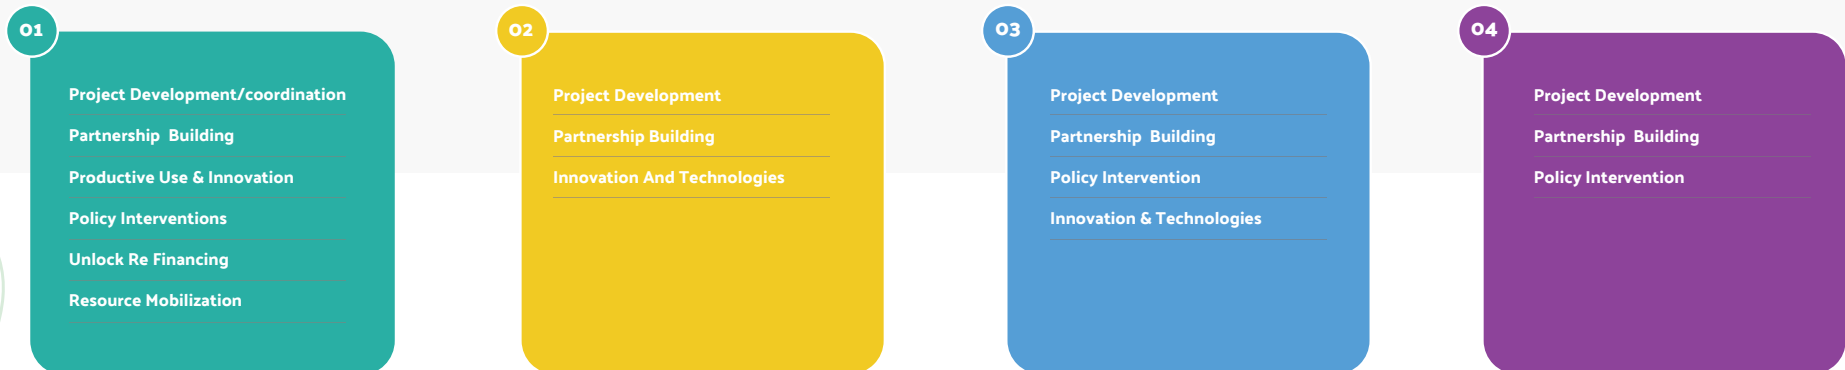

## **Gender and Youth Mainstreaming**

Improving policies, programs and projects, to ensure efficient allocation of resources to increase well-being for women, men and youths to create a socially just and sustainable society.

## Timeline

## Activities

# AAF Core Values

Our values define the spirit in which we want to carry out our work amongst ourselves, with one another and everyone we partner with so that together we can help improve people's lives and the earth we live in.

We embrace core humanity and the planet's core values, such as food security, conservation of resources, prevention of risk and concern for survival, diversity and culture, which are fundamental aspects of both the material and spiritual quality of life.

## Humility & Perseverance

Humility is our source of strength, and we believe in people's inner abilities as agents of change.

## Impact Oriented

We are results oriented and believe our actions today create a significant impact tomorrow.

## Love, Kindness & Respect

Our best work arises when we treat each other with love, kindness and respect.

## Excellence

Excellence is our virtue, in everything we do, big or small. We commit our all for best results.

**“Amshaamsha Foundation commits to work with our partners to respond to the threat of climate change and seize on the opportunities to define resilient, low-emissions pathways that meets our developmental goals. These include mitigation actions such as the use of renewable energy and natural climate solutions, climate change adaptation, and systems transformation.”**
